Bring Legacy Storage to Azure. Slash Costs by up to 70%. Activate “Dark Data” with Microsoft Copilot

About CAEVES Intelligent Deep Storage™ & Copilot Connector™

CAEVES helps Microsoft customers optimize storage costs while bringing decades of “dark data” to life, supercharging Azure Blob Storage with multiprotocol file access, caching and data tiering, while securely indexing data to Microsoft Copilot for instant search and retrieval, all secured, and governed within their own Microsoft Azure environment.

What we offer

CAEVES delivers cost-optimized, deep and Microsoft AI-Ready storage for enterprise file and archive data, addressing the challenge of rising storage costs, lack of visibility and search capabilities.

Built natively for Microsoft Azure, our software-based solution slashes TCO by up to 70% by moving inactive “cold” data off premium tiers into deep object storage, while keeping every file instantly accessible through SMB/NFS and fully indexed for Microsoft Copilot.

Unlike traditional data archives that create “dark data”, CAEVES keeps files accessible to users and applications. The solution provides Azure-native, and AI-ready infrastructure, integrating seamlessly with Microsoft Copilot, Copilot Studio and extended AI services, so data remains a visible, strategic asset to the business.

What our customers are saying

“By moving our data to CAEVES, we have been able to save over $1,4M on storage and archive costs, without compromising security or access. Being able to have real conversations with our historical data, changed how we work. It helps the business learn from its own past.”

– CIO, Global Engineering Firm (Nordics)

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
